

Bringing Dowerin *downtown*

Supporting agricultural prosperity

From sophisticated technology driving farm productivity and efficiencies to navigating supply chain, food security and workforce issues, climate change regulations, global fertiliser supply shortages and political and logistical export challenges, Australia's \$80 billion agriculture industry is experiencing accelerated change and innovation.

WA's largest agricultural industry event, Dowerin GWN7 Machinery Field Days is an icon in the Central Wheatbelt, with a proud 58-year history of growing industry, seeding connections and cultivating community.

For the first time we're bringing Dowerin downtown, offering you the chance to join business and political leaders, and our farmers, for a conversation on the outlook for WA agriculture.

The presenters will highlight the importance of agriculture to our economy and discuss the significant policies, key challenges, and trending opportunities for the sector.

Join us for lunch as we celebrate Australia's vital agricultural industry and our regional communities.

Paul Slaughter
Chief Executive
Harvest Road Group

Hon. Alannah MacTiernan MLC
Minister for Regional Development,
Agriculture and Food; Hydrogen Industry
